2 Daily figures analysis

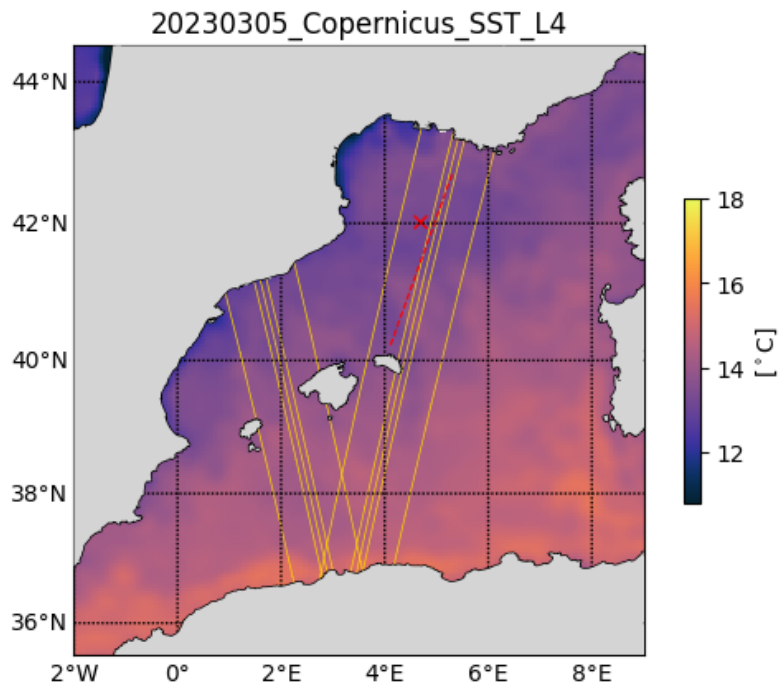

2.1 Altimetry, derived currents

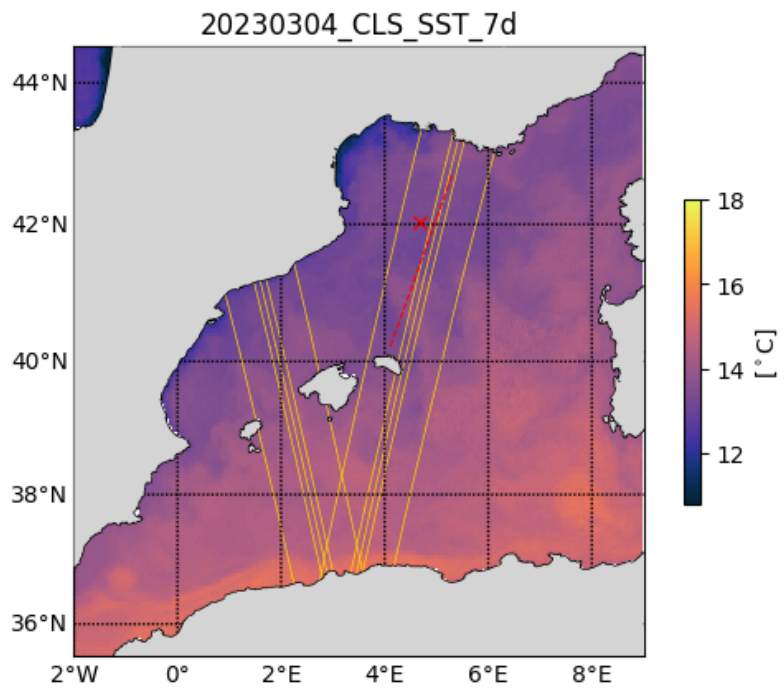

Type here.

2.2 SST analysis

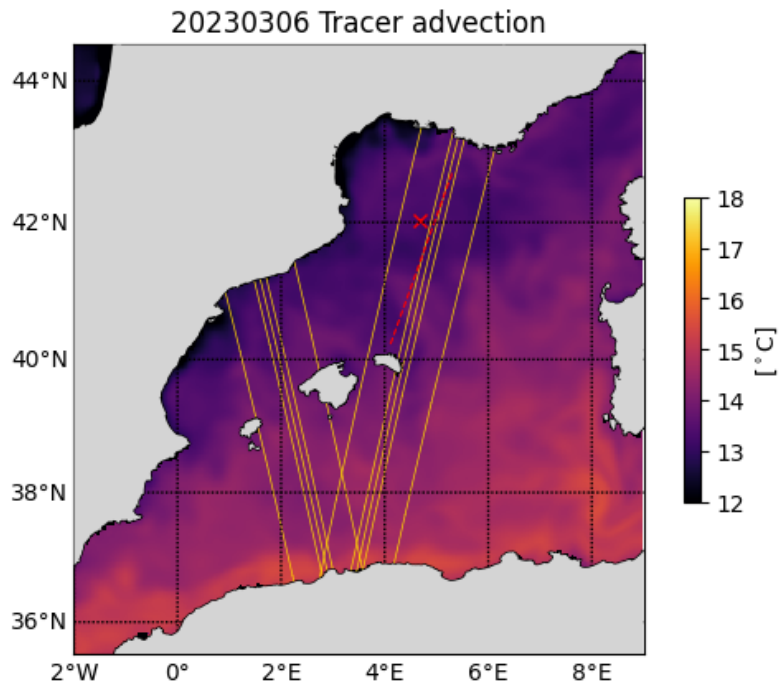

Type here.

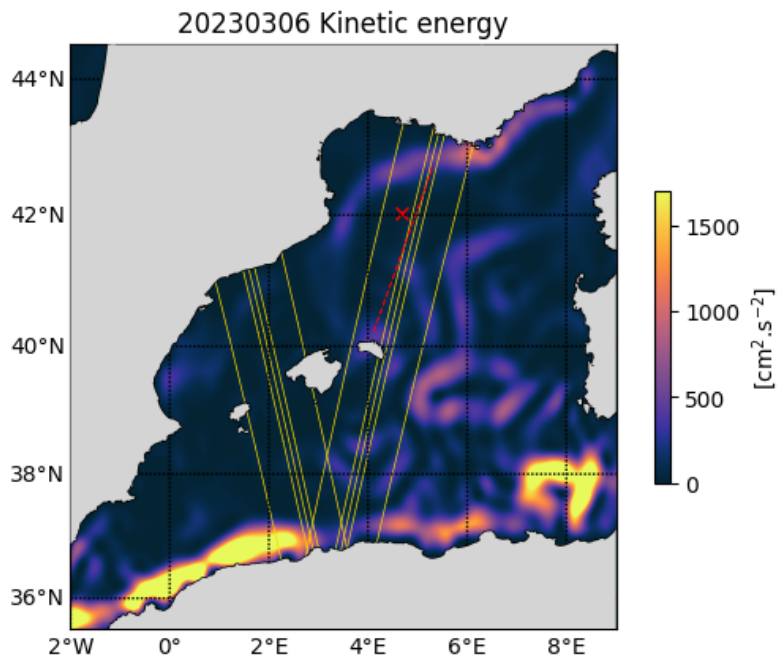

2.3 Chlorophyll analysis

Type here.

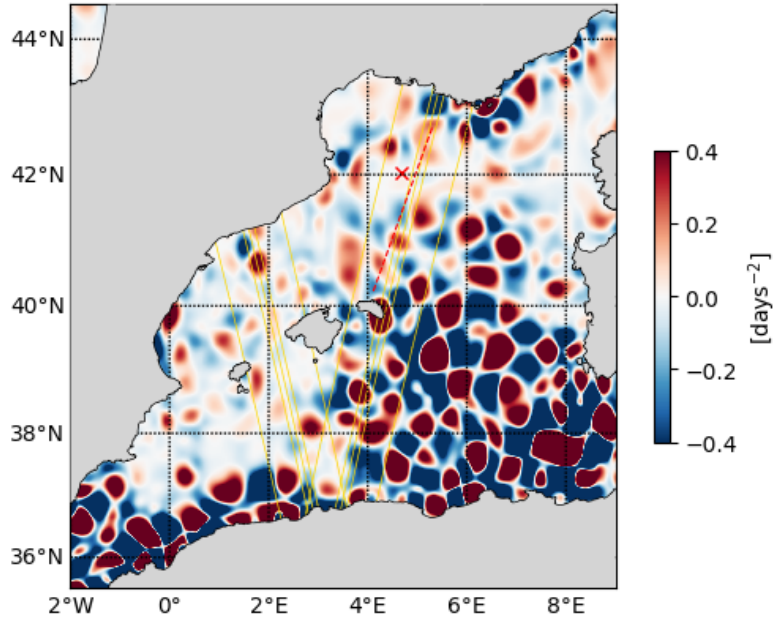

2.4 Eulerian/Lagrangian analysis

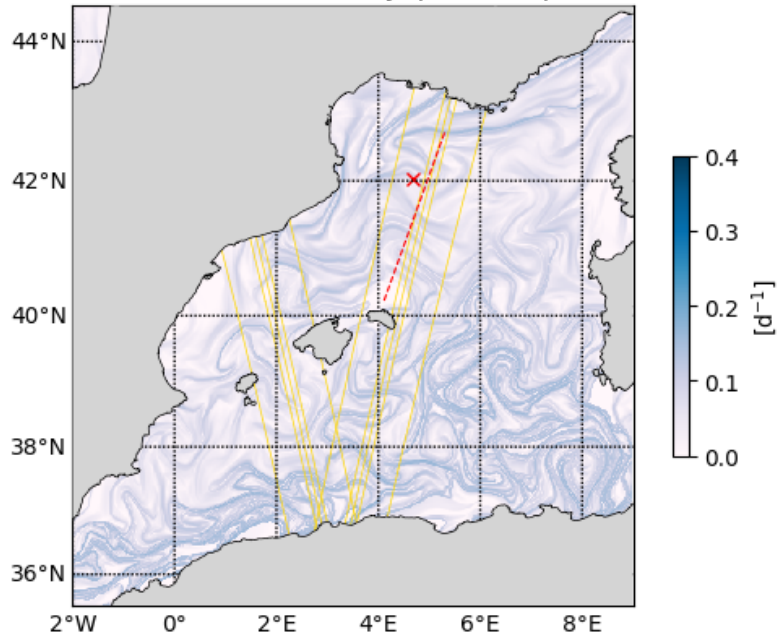

Type here.

20230306 Okubo-Weiss parameter

20230306 Finite Time Lyapunov Exponent

2.5 Other analysis

Type here.

Acknowledgments

Example:

The altimetry data are the AVISO Mediterranean regional product: <http://www.aviso.altimetry.fr/index.php?ic>
The derived currents are processed by SPASSO to derive Eulerian and Lagrangian diagnostics of ocean circulation: OkuboWeiss parameter, particle retention time and advection, Lagrangian Coherent Structures. CLS provided the SST and surface CHL concentration composite products. Sea surface temperature (level 3 and 4, 1 km resolution) and chlorophyll concentration (level 3, 1km resolution, MODISAqua and NPPVIIRS sensors combined (after May 27, 2017) into a new product called MULTI) have been provided by CMEMS Copernicus Marine Environment Monitoring Service (<http://marine.copernicus.eu>). Another SST product (level 4, composite, 1 km resolution) is provided by the Jet Propulsion Laboratory (JPL), Pasadena, CA.
