2 Daily figures analysis

2.1 Altimetry, derived currents

Type here.

20230502_CLS_PHY

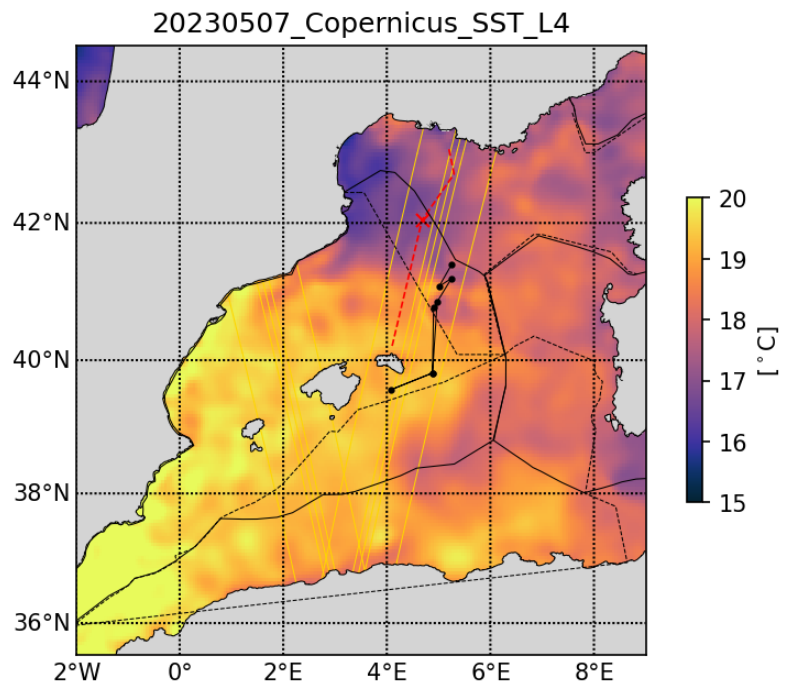

2023041017_Copernicus_PHY_WIND

2.2 SST analysis

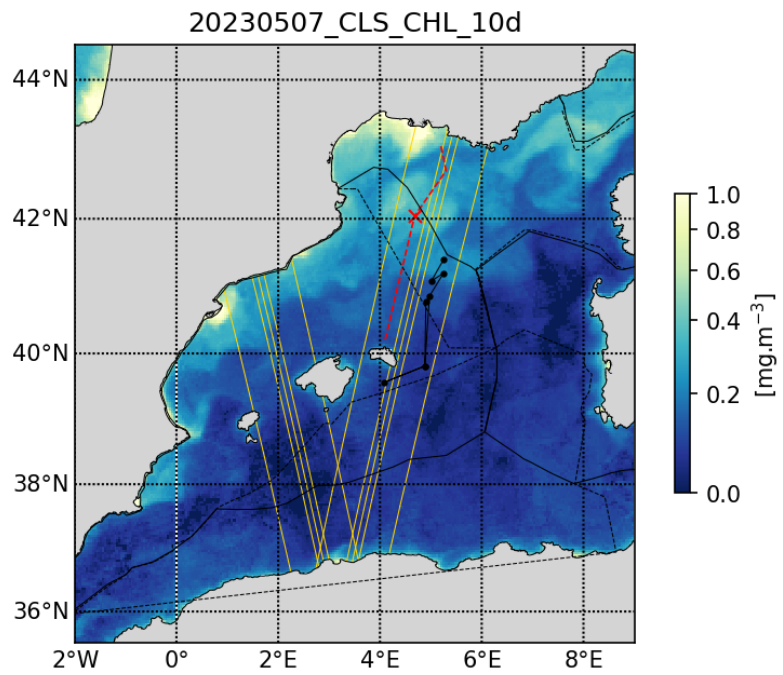

Type here.

2.3 Chlorophyll analysis

Type here.

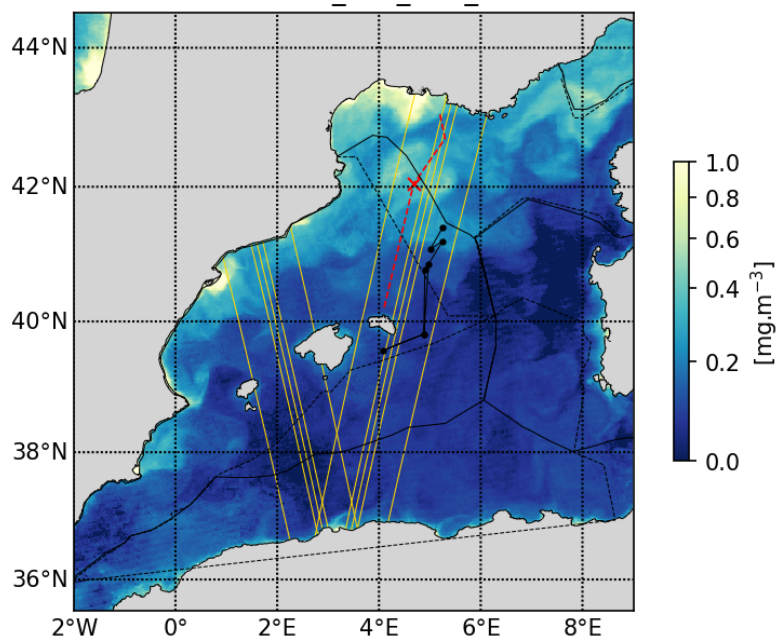

20230507_CLS_CHL_10d

20230505_CLS_CHL_5d

2.4 Eulerian/Lagrangian analysis

Eulerian diagnostics computed with Copernicus_PHY velocities:

KE: kinetic energy

OW: Okubo-Weiss parameter

Lagrangian diagnostics computed by seeding Lagrangian particles every 0.02deg and advected for 30 days backward in time with Copernicus_PHY velocities:

FTLE: finite time Lyapunov exponents (convergent fronts detection)

LLADV: longitude and latitude advection

Retention parameter (based on computing the okubo Weiss parameter along a particle trajectory): Detect trapping structures (colorbar = days water parcels have a positive vorticity)

Timefrombathy: Water age since last contact with isobath XXm (precised in figure title)

More details available at: <https://www.swot-adac.org/resources/swot-adac-products-access/>

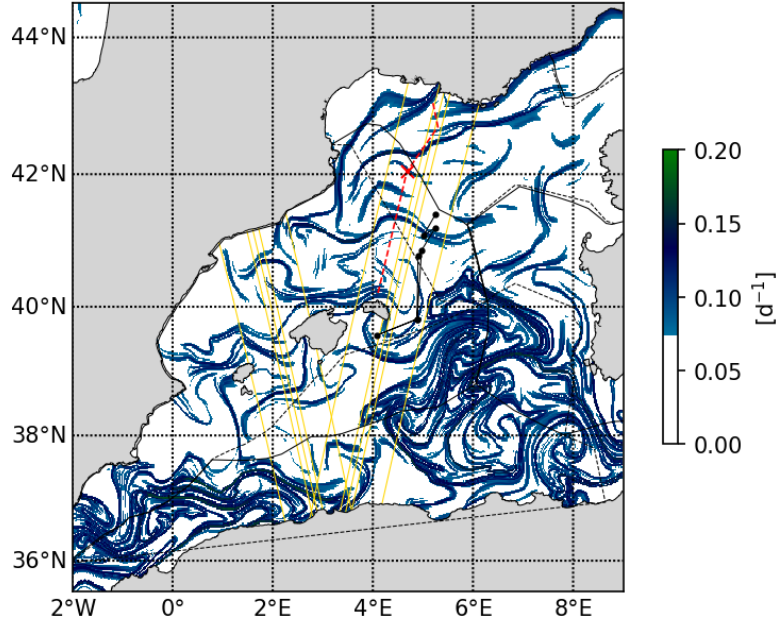

20230508 Okubo-Weiss parameter

20230508 Okubo-Weiss parameter

20230508 Finite Time Lyapunov Exponent

20230508 Finite Time Lyapunov Exponent

20230508 LonAdv

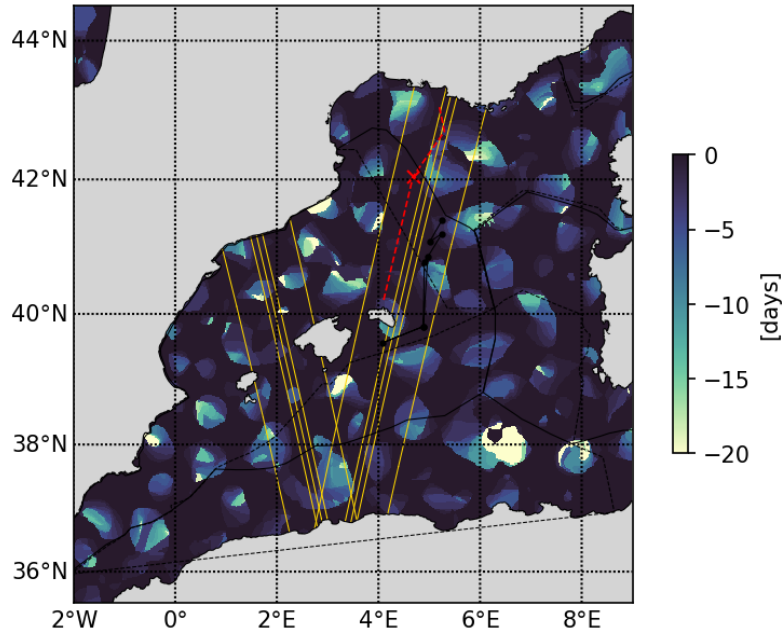

20230508 LatAdv

20230508 Retention parameter

20230508 Retention parameter

20230508 Timefrombathy_500m

20230508 Latfrombathy_500m

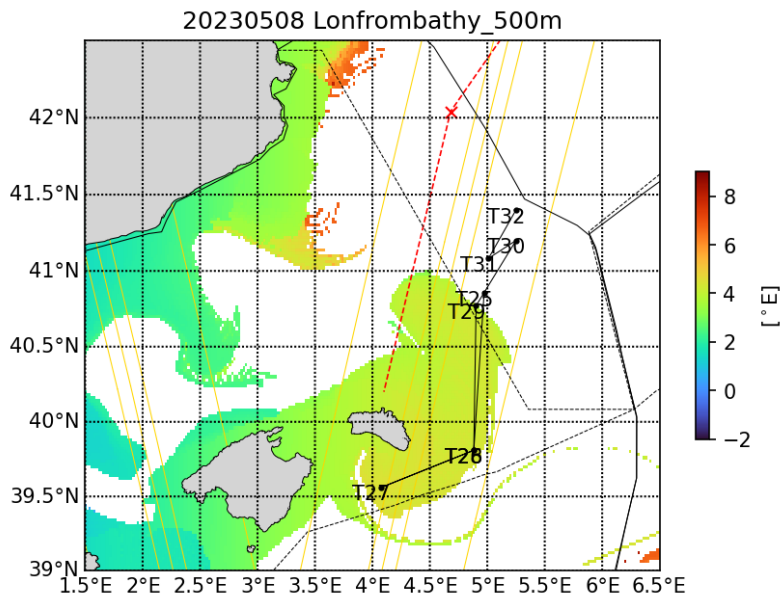

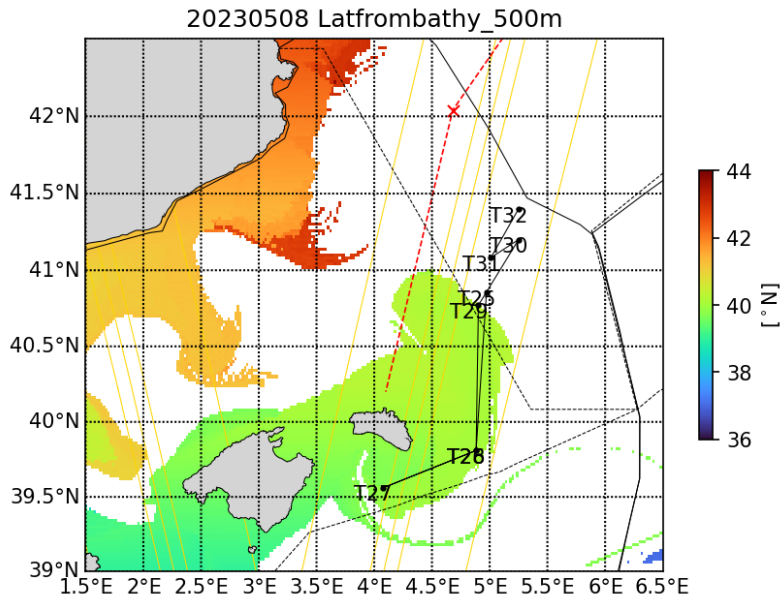

20230508 Lonfrombathy_500m

20230508 Tracer advection

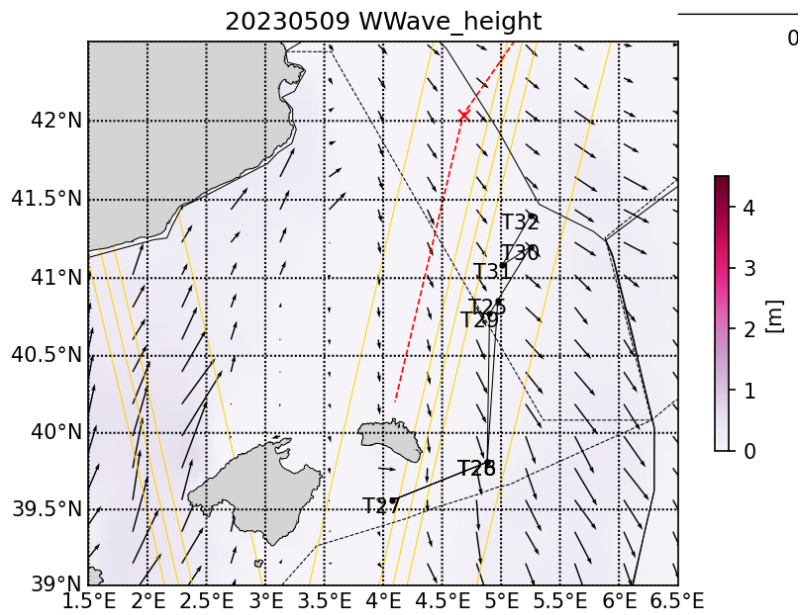

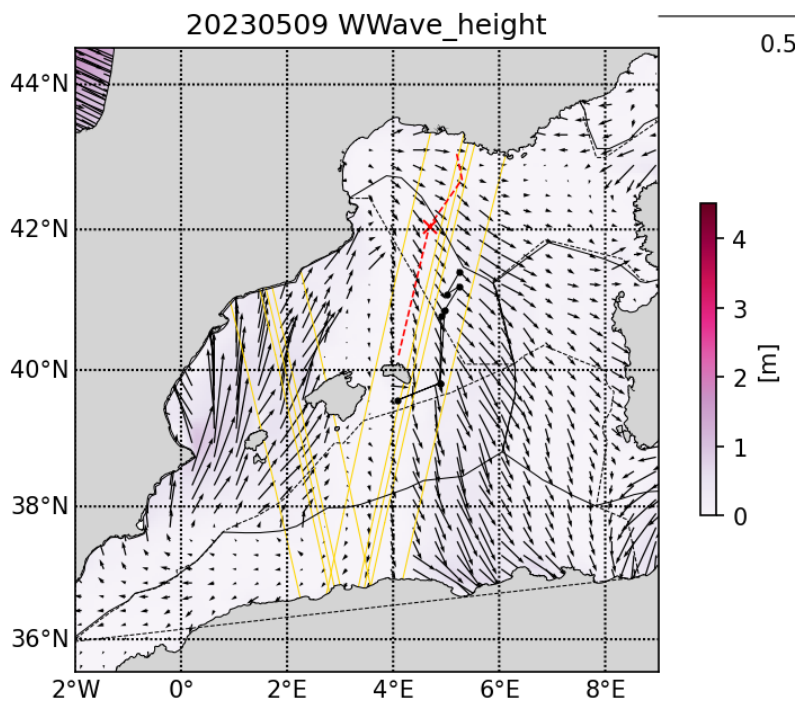

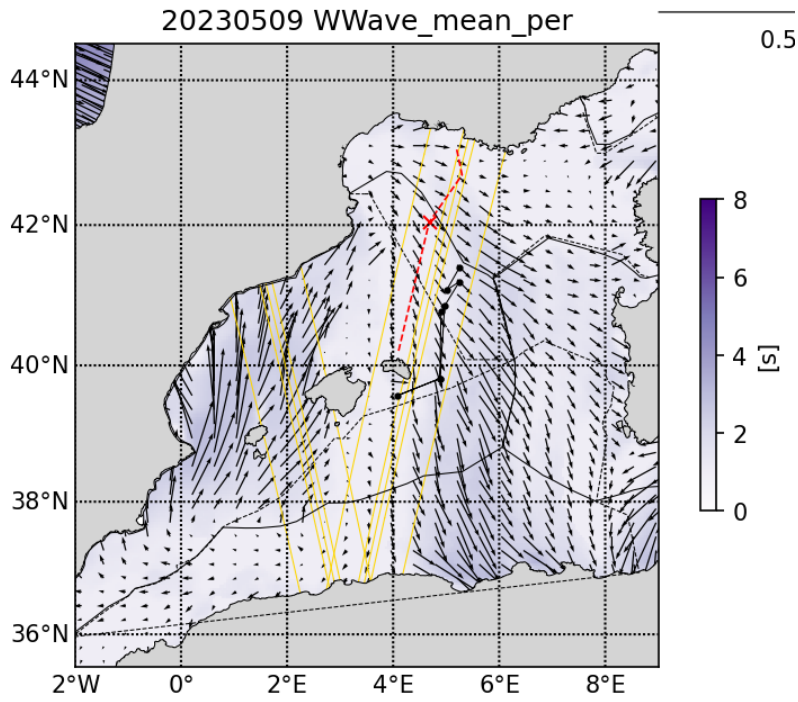

20230508 Tracer advection

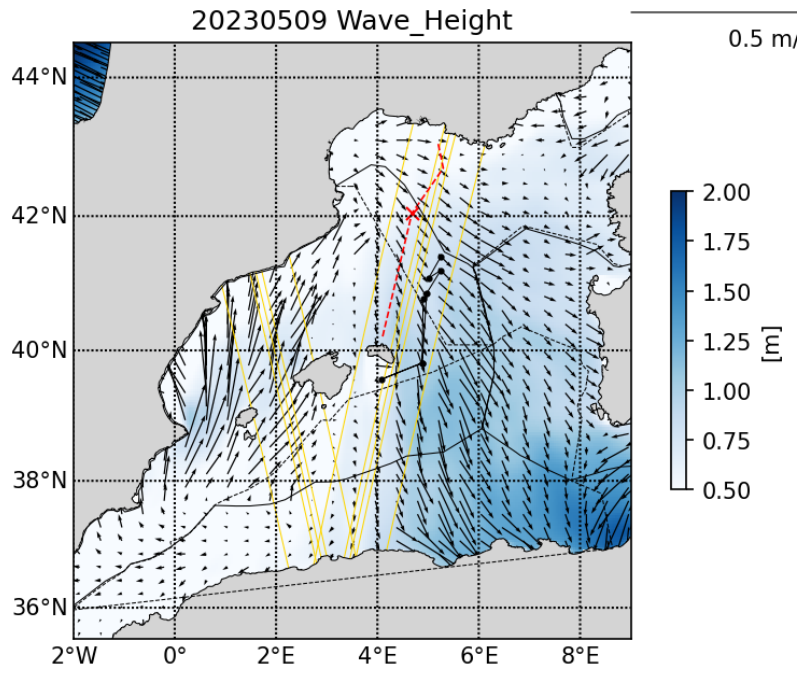

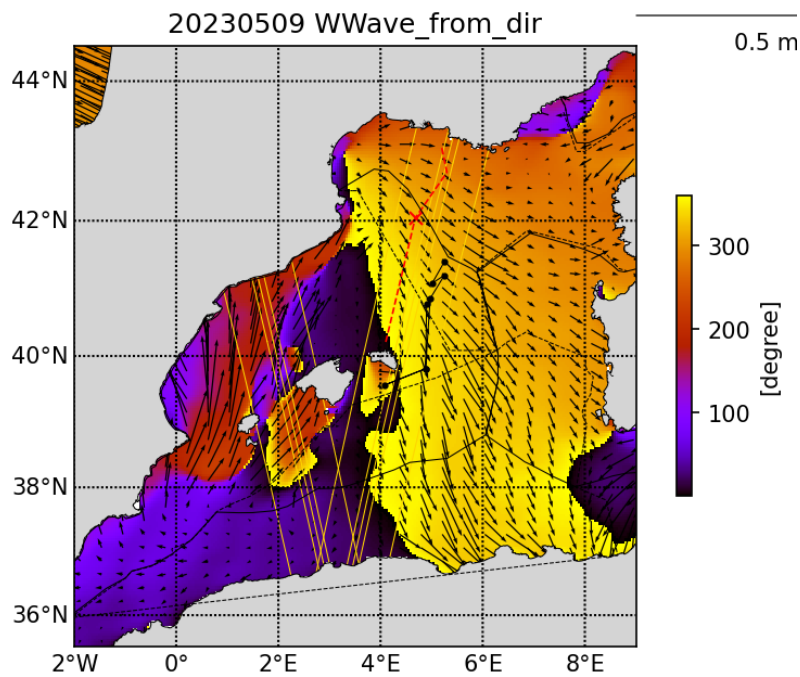

2.5 Wave forecast analysis

Type here.

Acknowledgments

Example:

The altimetry data are the AVISO Mediterranean regional product: <http://www.aviso.altimetry.fr/index.php?id=1275>. The derived currents are processed by SPASSO to derive Eulerian and Lagrangian diagnostics of ocean circulation: OkuboWeiss parameter, particle retention time and advection, Lagrangian Coherent Structures. CLS provided the SST and surface CHL concentration composite products. Sea surface temperature (level 3 and 4, 1 km resolution) and chlorophyll concentration (level 3, 1km resolution, MODISAqua and NPPVIIRS sensors combined (after May 27, 2017) into a new product called MULTI) have been provided by CMEMS Copernicus Marine Environment Monitoring Service (<http://marine.copernicus.eu>). Another SST product (level 4, composite, 1 km resolution) is provided by the Jet Propulsion Laboratory (JPL), Pasadena, CA. SPASSO is operated with the support of the SIP (Service Informatique de Pythéas) and in particular C. Yohia, J. Lecubin. D. Zevaco and C. Blanpain (Institut Pythéas, Marseille, France).
